

KPI DEFINITION DOCUMENT

Document 09 of 09 · B2B Data Engineering Platform

Defines every KPI delivered by the platform: business meaning, formula, grain, filters, sources, refresh and validation.

Document ID	B2B-DEP-09
Version	1.3
Status	Final
Date	05/10/2026

1. Introduction

1.1 Purpose

This document is the single reference for what each KPI means and how it is calculated.

1.2 Scope

In scope:

- The 15 KPI views in the marts schema and the Power BI dashboard pages that use them

Out of scope:

- Pipeline internals (Development Document)

1.3 Intended Audience

Table 1: Intended Audience

Audience	How they use this document
Business users / Analysts	Understand and trust the numbers
Data Engineers	Maintain KPI logic
QA	Validate KPI results

1.4 Definitions & Acronyms

Table 2: Definitions & Acronyms

Term	Definition
AOV	Average order value = revenue / number of orders.
B2B	Business-to-Business: companies selling to other companies.
BI	Business Intelligence: reporting and dashboards, here Power BI.
BRD	Business Requirements Document: here the Project Requirements Document provided by DataRopes.
CDC	Change Data Capture: extracting only the rows that changed since the last run (here: watermark on updated_at).
DAX	Data Analysis Expressions: the formula language of Power BI measures.
DEP	Data Engineering Platform: prefix of the document IDs (B2B-DEP-01 ...).
Gross revenue	SUM(quantity x unit_price) before discounts.
ID	Identifier.
KPI	Key Performance Indicator: a measurable value that answers a business question.
Mart view	SQL view in schema marts that Power BI reads.
MoM	Month-over-Month: change compared with the previous month.
Net revenue	SUM(line_total) = after discounts; cancelled orders excluded.
SQL	Structured Query Language.
UTM	Urchin Tracking Module: campaign parameters (utm_source, utm_medium, utm_campaign).

2. KPI Catalogue

Table 3: KPI Catalogue

KPI ID	KPI Name	Business Question	Audience	Mart View	Dashboard Page
--------	----------	-------------------	----------	-----------	----------------

KPI ID	KPI Name	Business Question	Audience	Mart View	Dashboard Page
KPI-01	Monthly Revenue Trend	How is revenue developing month by month?	Management	marts.vw_monthly_revenue_trend	Executive Overview
KPI-02	Revenue by Company	Which buyer companies bring most revenue (Pareto)?	Sales / Management	marts.vw_revenue_by_company	Executive Overview
KPI-03	Revenue by Product	Which products are bestsellers or slow movers?	Product / Category managers	marts.vw_revenue_by_product	Product & Profitability
KPI-04	Gross Margin Analysis	What margin do we make per product and supplier?	Finance / Purchasing	marts.vw_gross_margin_analysis	Product & Profitability
KPI-05	Customer Lifetime Value	How much has each buyer company spent, by acquisition cohort?	Sales / Account management	marts.vw_customer_lifetime_value	Customer Intelligence
KPI-06	Customer Activity	How often do customers buy and how much per order?	Sales / Marketing	marts.vw_customer_activity	Customer Intelligence
KPI-07	Geographic Sales	Where do our sales come from and which regions grow?	Management / Sales	marts.vw_geographic_sales	Customer Intelligence
KPI-08	Traffic by Device	Which devices do visitors use and how often do they reach checkout?	Marketing / Web team	marts.vw_traffic_by_device	Web & Traffic Analytics
KPI-09	Geographic Web Traffic	Where does web traffic come from and what are the top referrers?	Marketing / Web team	marts.vw_geographic_web_traffic	Web & Traffic Analytics
KPI-10	Web Activity Quality	Which pages produce errors?	Web team / IT	marts.vw_web_activity_quality	Web & Traffic Analytics
KPI-11	Lead Conversion Funnel	Which sources and campaigns turn leads into orders?	Marketing	marts.vw_lead_conversion_funnel	Lead Quality & Sales Funnel
KPI-12	Lead Quality vs Order Value	Do higher-scored leads place bigger orders?	Marketing / Sales	marts.vw_lead_quality_vs_order_value	Lead Quality & Sales Funnel
KPI-13	Supplier Revenue	Which suppliers generate most revenue and how concentrated is it?	Purchasing / Management	marts.vw_supplier_revenue	Supplier Performance
KPI-14	Supplier Product Performance	Which supplier-product combinations perform best?	Purchasing	marts.vw_supplier_product_performance	Supplier Performance
KPI-15	Pipeline Execution Metrics	Is the data pipeline healthy and the data fresh?	Data Engineering	marts.vw_pipeline_execution_metrics	Pipeline Health

3. KPI Definition Cards

3.1 KPI-01 Monthly Revenue Trend

Table 4: KPI-01 Monthly Revenue Trend — definition card

Business question	How is revenue developing month by month?
Definition	Gross and net revenue per calendar month with month-over-month growth.
Formula	Gross = SUM(quantity x unit_price); Net = SUM(line_total); MoM % = (this month - previous month) / previous month x 100
Unit	Currency; %
Grain	Calendar month (complete months only: the current month and the partial first month are left out)
Dimensions / slicers	Year, month
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_date
Mart view / SQL file	marts.vw_monthly_revenue_trend - postgresql/marts/KPI1.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Management
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Executive Overview page: Line and column combo chart; cards Total Net Revenue, Latest Net MoM %
Validation	Sum of monthly net revenue = non-cancelled line revenue of the same 23 complete months. Expected 4,400,274,489.23, actual 4,400,274,489.23 - Pass

3.2 KPI-02 Revenue by Company

Table 5: KPI-02 Revenue by Company — definition card

Business question	Which buyer companies bring most revenue (Pareto)?
Definition	Gross revenue per buyer company, ranked, with cumulative share and Top-20 % flag.
Formula	Gross revenue per company (grouped by company_id, current name shown); rank / total companies <= 0.20 = 'Top 20%'
Unit	Currency; %
Grain	Buyer company
Dimensions / slicers	Company, performance group
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled'); buyers only
Source tables	fact_order_items, dim_companies
Mart view / SQL file	marts.vw_revenue_by_company - postgresql/marts/KPI2.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Sales / Management
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Executive Overview page: Clustered bar chart
Validation	Sum of company gross revenue = SUM(quantity x unit_price) of buyer, non-cancelled lines. Expected 5,133,378,828.46, actual 5,133,378,828.46 - Pass

3.3 KPI-03 Revenue by Product

Table 6: KPI-03 Revenue by Product — definition card

Business question	Which products are bestsellers or slow movers?
Definition	Net revenue per product and category, ranked into Best Sellers (top 30 %), Average and Slow Movers (bottom 30 %).
Formula	Net revenue = SUM(line_total) of non-cancelled order lines per product
Unit	Currency
Grain	Product
Dimensions / slicers	Product, category, performance group
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_products

Business question	Which products are bestsellers or slow movers?
Mart view / SQL file	marts.vw_revenue_by_product - postgresql/marts/KPI3.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Product / Category managers
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Product & Profitability page: Clustered bar chart
Validation	Sum of product net revenue = total net revenue; one row per product. Expected 4,621,200,118.84, actual 4,621,200,118.84 - Pass

3.4 KPI-04 Gross Margin Analysis

Table 7: KPI-04 Gross Margin Analysis — definition card

Business question	What margin do we make per product and supplier?
Definition	Actual selling price vs catalog price and supplier price, with gross profit and margin %.
Formula	Gross profit = SUM(line_total) - SUM(quantity x supplier_price); Margin % = gross profit / SUM(line_total) x 100
Unit	Currency; %
Grain	Product x supplier
Dimensions / slicers	Product, supplier
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_products, dim_suppliers, dim_supplier_product
Mart view / SQL file	marts.vw_gross_margin_analysis - postgresql/marts/KPI4.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Finance / Purchasing
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Product & Profitability page: Table and cards
Validation	Sum of gross profit = SUM(line_total - quantity x supplier_price). Expected 954,597,910.13, actual 954,597,910.13 - Pass

3.5 KPI-05 Customer Lifetime Value

Table 8: KPI-05 Customer Lifetime Value — definition card

Business question	How much has each buyer company spent, by acquisition cohort?
Definition	Total spend and orders per buyer company; cohort = month of the first order.
Formula	Total spend = SUM(line_total); orders = COUNT(DISTINCT order_id); cohort = TO_CHAR(MIN(order_date), 'YYYY-MM')
Unit	Currency; count
Grain	Buyer company
Dimensions / slicers	Company, country, cohort
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, fact_orders, dim_companies
Mart view / SQL file	marts.vw_customer_lifetime_value - postgresql/marts/KPI5.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Sales / Account management
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Customer Intelligence page: Bar chart, matrix, cohort slicer
Validation	Sum of company total spend = net revenue of buyer companies. Expected 4,621,200,118.84, actual 4,621,200,118.84 - Pass

3.6 KPI-06 Customer Activity

Table 9: KPI-06 Customer Activity — definition card

Business question	How often do customers buy and how much per order?
Definition	Orders per customer, average order value (AOV) and repeat purchase rate.
Formula	AOV = SUM(order_total) / COUNT(orders); Repeat rate = customers with > 1 order / active customers x 100

Business question	How often do customers buy and how much per order?
Unit	Count; currency; %
Grain	Customer
Dimensions / slicers	Customer status (repeat / one-time)
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_orders
Mart view / SQL file	marts.vw_customer_activity - postgresql/marts/KPI6.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Sales / Marketing
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Customer Intelligence page: Clustered column chart; cards Repeat Rate, Average Customer AOV
Validation	Repeat purchase rate recomputed from fact_orders. Expected 60.31, actual 60.31 - Pass

3.7 KPI-07 Geographic Sales

Table 10: KPI-07 Geographic Sales — definition card

Business question	Where do our sales come from and which regions grow?
Definition	Revenue and order count by country and city; the top city per country is flagged 'Growth Region'.
Formula	Net revenue = SUM(line_total) of non-cancelled order lines per country and city
Unit	Currency; count
Grain	Country x city
Dimensions / slicers	Country, city
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_companies
Mart view / SQL file	marts.vw_geographic_sales - postgresql/marts/KPI7.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Management / Sales
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Customer Intelligence page: Map and table
Validation	Sum of revenue by location = total net revenue. Expected 4,621,200,118.84, actual 4,621,200,118.84 - Pass

3.8 KPI-08 Traffic by Device

Table 11: KPI-08 Traffic by Device — definition card

Business question	Which devices do visitors use and how often do they reach checkout?
Definition	Sessions per device type and the share of sessions that reached /checkout.
Formula	Conversion % = sessions with a /checkout request / sessions x 100
Unit	Count; %
Grain	Device type
Dimensions / slicers	Device type
Filters & exclusions	Bot traffic excluded (is_bot = FALSE)
Source tables	fact_web_logs
Mart view / SQL file	marts.vw_traffic_by_device - postgresql/marts/KPI8.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Marketing / Web team
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Web & Traffic Analytics page: Donut chart
Validation	Sum of sessions = distinct (session, device) of non-bot requests. Expected 281,911, actual 281,911 - Pass

3.9 KPI-09 Geographic Web Traffic

Table 12: KPI-09 Geographic Web Traffic — definition card

Business question	Where does web traffic come from and what are the top referrers?
Definition	Sessions by country, city and referrer; the top referrer per location is flagged.
Formula	Sessions = COUNT(DISTINCT session_id)
Unit	Count
Grain	Country x city x referrer
Dimensions / slicers	Country, city, referrer
Filters & exclusions	Bot traffic excluded
Source tables	fact_web_logs
Mart view / SQL file	marts.vw_geographic_web_traffic - postgresql/marts/KPI9.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Marketing / Web team
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Web & Traffic Analytics page: Map
Validation	Countries in the view = countries in non-bot web logs. Expected 3, actual 3 - Pass

3.10 KPI-10 Web Activity Quality

Table 13: KPI-10 Web Activity Quality — definition card

Business question	Which pages produce errors?
Definition	Requests and 4xx / 5xx errors per endpoint with error rate.
Formula	Error rate % = (4xx + 5xx requests) / all requests x 100
Unit	Count; %
Grain	Request path
Dimensions / slicers	Endpoint
Filters & exclusions	All traffic (bots included)
Source tables	fact_web_logs
Mart view / SQL file	marts.vw_web_activity_quality - postgresql/marts/KPI10.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Web team / IT
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Web & Traffic Analytics page: Bar chart and cards
Validation	Sum of requests by endpoint = all web-log rows; errors = status 400-599. Expected 296703 / 59348, actual 296703 / 59348 - Pass

3.11 KPI-11 Lead Conversion Funnel

Table 14: KPI-11 Lead Conversion Funnel — definition card

Business question	Which sources and campaigns turn leads into orders?
Definition	Leads, qualified leads, converted leads and orders per source, campaign and UTM channel.
Formula	Conversion % = converted leads / total leads x 100
Unit	Count; %
Grain	Source x campaign x UTM
Dimensions / slicers	Source, campaign, utm_source, utm_medium
Filters & exclusions	None
Source tables	fact_leads
Mart view / SQL file	marts.vw_lead_conversion_funnel - postgresql/marts/KPI11.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Marketing
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Lead Quality & Sales Funnel page: Funnel, cards (Lead Conversion Rate), slicers
Validation	Sum of converted leads = leads with conversion_status 'Converted'. Expected 6,044, actual 6,044 - Pass

3.12 KPI-12 Lead Quality vs Order Value

Table 15: KPI-12 Lead Quality vs Order Value — definition card

Business question	Do higher-scored leads place bigger orders?
Definition	Correlation between lead score and the value of the order the lead produced.
Formula	$\text{CORR}(\text{lead_score}, \text{order_total})$ over converted leads
Unit	Coefficient (-1 to 1)
Grain	All converted leads
Dimensions / slicers	-
Filters & exclusions	Converted leads with a non-cancelled order
Source tables	fact_leads, fact_orders
Mart view / SQL file	marts.vw_lead_quality_vs_order_value - postgresql/marts/KPI12.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Marketing / Sales
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Lead Quality & Sales Funnel page: Cards
Validation	Converted-lead count = independent join count; correlation within -1..1. Expected 5748 $r=0.0071$, actual 5748 $r=0.0071$ - Pass

3.13 KPI-13 Supplier Revenue

Table 16: KPI-13 Supplier Revenue — definition card

Business question	Which suppliers generate most revenue and how concentrated is it?
Definition	Orders and revenue per supplier with share of total and rank.
Formula	$\text{Share \%} = \text{supplier revenue} / \text{total revenue} \times 100$
Unit	Currency; %
Grain	Supplier
Dimensions / slicers	Supplier
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_suppliers
Mart view / SQL file	marts.vw_supplier_revenue - postgresql/marts/KPI13.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Purchasing / Management
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Supplier Performance page: Cards
Validation	Sum of supplier revenue = total net revenue; shares add up to 100 %. Expected 4621200118.84 100%, actual 4621200118.84 100% - Pass

3.14 KPI-14 Supplier Product Performance

Table 17: KPI-14 Supplier Product Performance — definition card

Business question	Which supplier-product combinations perform best?
Definition	Orders, quantity and revenue per supplier and product.
Formula	$\text{Net revenue} = \text{SUM}(\text{line_total})$ of non-cancelled order lines per supplier-product pair
Unit	Currency; count
Grain	Supplier x product
Dimensions / slicers	Supplier, product
Filters & exclusions	Cancelled orders excluded (order_status <> 'Cancelled')
Source tables	fact_order_items, dim_suppliers, dim_products
Mart view / SQL file	marts.vw_supplier_product_performance - postgresql/marts/KPI14.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Purchasing
Target / threshold	Monitoring KPI - no fixed target
Visualisation	Supplier Performance page: Bar and column charts, matrix

Business question	Which supplier-product combinations perform best?
Validation	Sum of supplier-product revenue = total net revenue. Expected 4,621,200,118.84, actual 4,621,200,118.84 - Pass

3.15 KPI-15 Pipeline Execution Metrics

Table 18: KPI-15 Pipeline Execution Metrics — definition card

Business question	Is the data pipeline healthy and the data fresh?
Definition	Average load time, success and error rate per pipeline stage, data freshness and CDC watermark lag.
Formula	Error rate % = failed runs / runs x 100; freshness = now - last watermark
Unit	Duration; %
Grain	Pipeline stage
Dimensions / slicers	Pipeline, run date
Filters & exclusions	Finished runs only
Source tables	metadata.pipeline_run_log, metadata.pipeline_watermarks
Mart view / SQL file	marts.vw_pipeline_execution_metrics (+ vw_pipeline_run_history, vw_pipeline_latest_run) - postgresql/marts/KPI15.sql (deployed by marts_ddl.sql)
Refresh	After every pipeline run (views read the warehouse directly); Power BI refresh
Owner / audience	Data Engineering
Target / threshold	All stages 'completed'; freshness below one day
Visualisation	Pipeline Health page: Cards, area charts, tables; measures Last Run Status, Data Freshness, Watermark Lag
Validation	One row per pipeline in the run log; data freshness / watermark lag populated. Expected 5 rows, 5 with freshness, actual 5 rows, 5 with freshness - Pass

4. Semantic Model & Measures

Table 19: Semantic Model & Measures

Measure	Definition / DAX	Table	Used In
Total Gross Revenue	SUM(vw_monthly_revenue_trend[gross_revenue])	vw_monthly_revenue_trend	Executive Overview
Total Net Revenue	SUM(vw_monthly_revenue_trend[net_revenue])	vw_monthly_revenue_trend	Executive Overview
Latest Net MoM %	net_mom_pct of the latest year and month	vw_monthly_revenue_trend	Executive Overview
Repeat Rate	DIVIDE(customers with status 'Repeat Customer', all customers) x 100	vw_customer_activity	Customer Intelligence
Average Customer AOV	AVERAGE(vw_customer_activity[average_order_value])	vw_customer_activity	Customer Intelligence
Lead Conversion Rate	DIVIDE(SUM(converted_leads), SUM(total_leads))	vw_lead_conversion_funnel	Lead Quality & Sales Funnel
Last Run Status	status of the latest run_timestamp	vw_pipeline_run_history	Pipeline Health
Data Freshness / Watermark Lag (Formatted)	Seconds formatted as 'Xd Yh' / 'Xh Ym'	vw_pipeline_execution_metrics	Pipeline Health

5. Dashboard Pages

Table 20: Dashboard Pages

Page	KPIs Shown	Audience
Executive Overview	KPI-01, KPI-02	Management
Product & Profitability	KPI-03, KPI-04	Product, finance
Customer Intelligence	KPI-05, KPI-06, KPI-07	Sales, account management
Web & Traffic Analytics	KPI-08, KPI-09, KPI-10	Marketing, web team
Lead Quality & Sales Funnel	KPI-11, KPI-12	Marketing, sales
Supplier Performance	KPI-13, KPI-14	Purchasing
Pipeline Health	KPI-15	Data engineering

Figure 1 shows 5. Dashboard Pages.

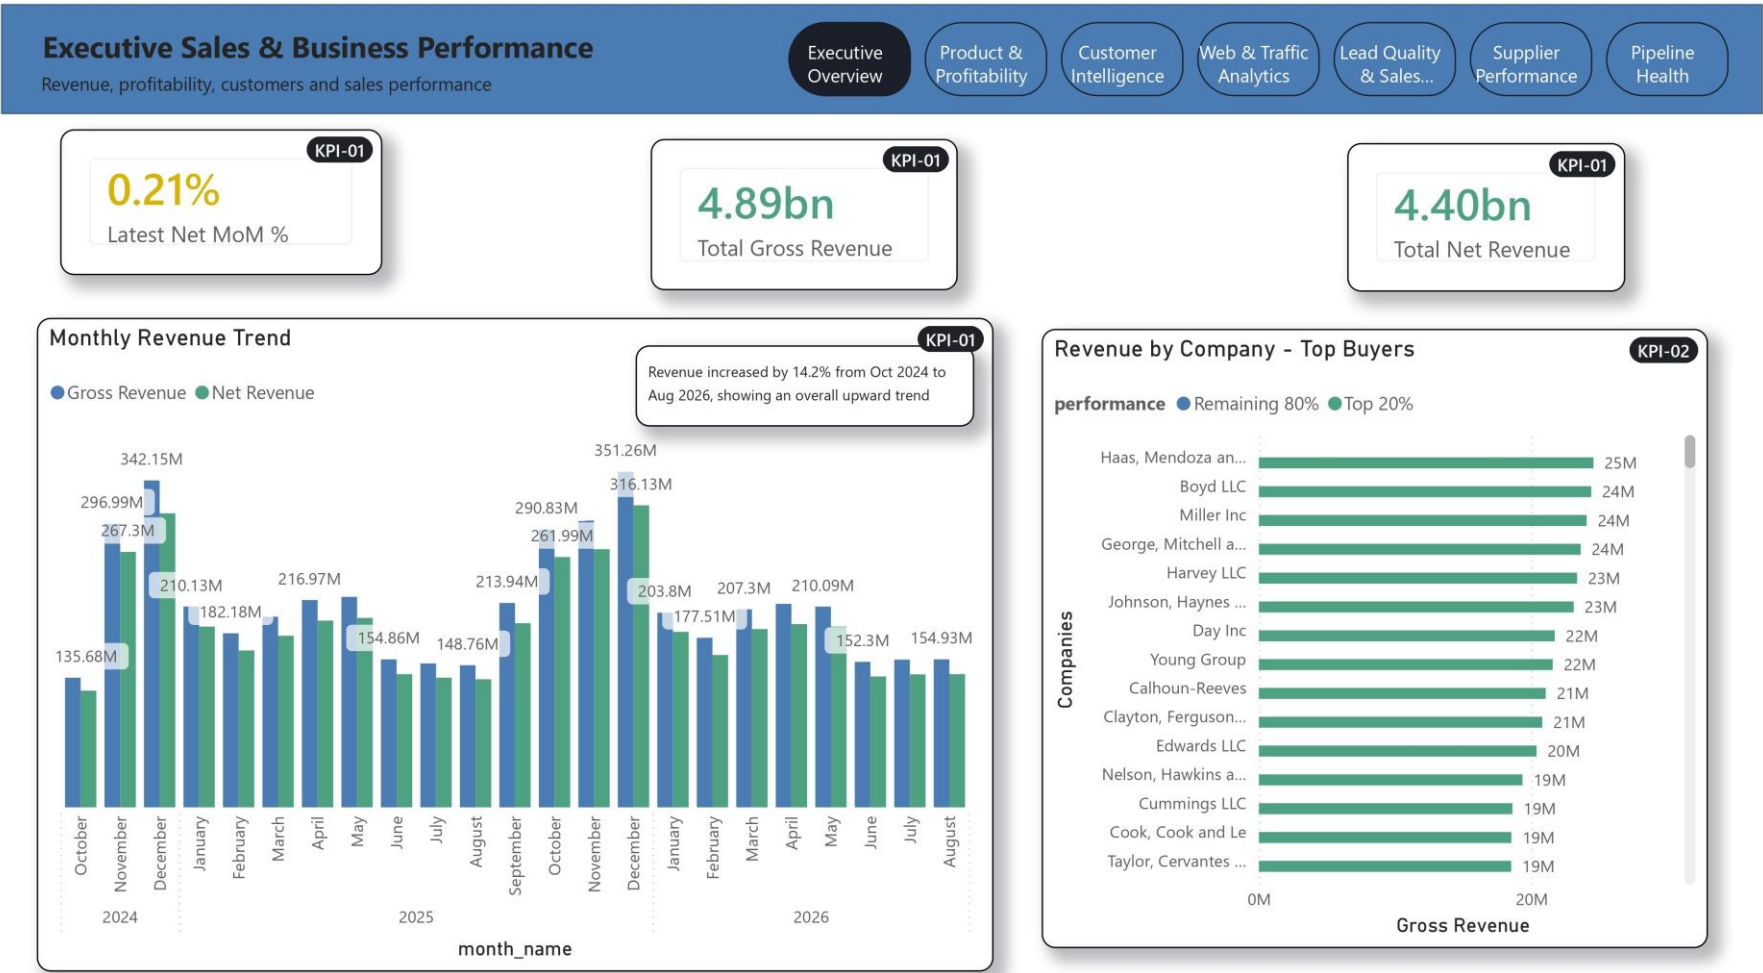

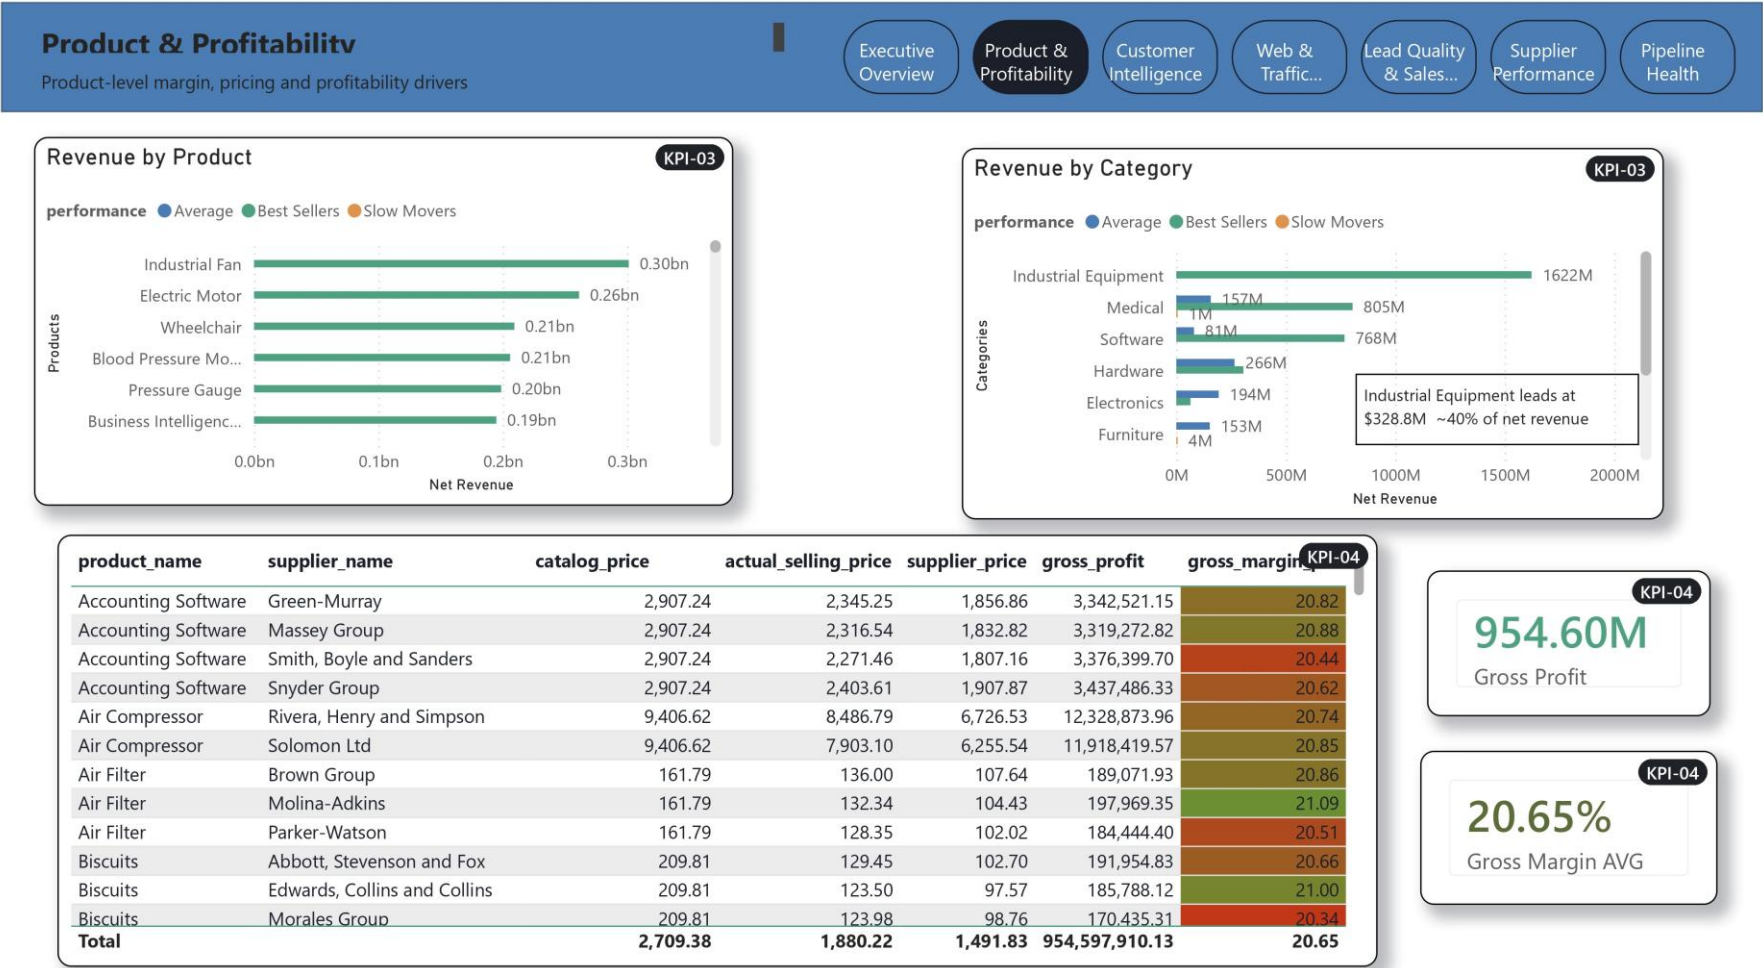

Figure 2 shows the Executive Overview page of the Power BI dashboard; every visual carries the number of the KPI it displays (KPI-01, KPI-02).

product_name	supplier_name	catalog_price	actual_selling_price	supplier_price	gross_profit	gross_margin
Accounting Software	Green-Murray	2,907.24	2,345.25	1,856.86	3,342,521.15	20.82
Accounting Software	Massey Group	2,907.24	2,316.54	1,832.82	3,319,272.82	20.88
Accounting Software	Smith, Boyle and Sanders	2,907.24	2,271.46	1,807.16	3,376,399.70	20.44
Accounting Software	Snyder Group	2,907.24	2,403.61	1,907.87	3,437,486.33	20.62
Air Compressor	Rivera, Henry and Simpson	9,406.62	8,486.79	6,726.53	12,328,873.96	20.74
Air Compressor	Solomon Ltd	9,406.62	7,903.10	6,255.54	11,918,419.57	20.85
Air Filter	Brown Group	161.79	136.00	107.64	189,071.93	20.86
Air Filter	Molina-Adkins	161.79	132.34	104.43	197,969.35	21.09

6. KPI Validation Summary

All 15 KPIs were validated on the final data set by comparing each view with an independent calculation on the warehouse tables (details in the Test Document, section 8, and 08b_Test_Case_Register.xlsx, sheet KPI_Validation). Result: **15 of 15 passed**.

- Net revenue is identical in KPI-03, 05, 07, 13 and 14: 4,621,200,118.84 (KPI-01 shows the 23 complete months only), and equals the sum of non-cancelled order totals.
- Repeat purchase rate 60.31 %, 6,044 converted leads, 59348 error requests out of 296703.
- KPI-12 shows a correlation of 0.0071 between lead score and order value, i.e. practically no relationship in the generated data.

Figure 8 shows the Pipeline Health page of the Power BI dashboard; every visual carries the number of the KPI it displays (KPI-15).

7. Glossary

Table 21: Glossary

Term	Definition
MoM	Month over month: change compared with the previous month.
Pareto (80/20)	Analysis showing that a small share of customers brings most revenue.
Cohort	Group of customers by the month of their first order.
Conversion rate	Share of leads (or sessions) that result in an order (or checkout).
Watermark lag	Time since the last extracted change; shows how fresh the data is.
